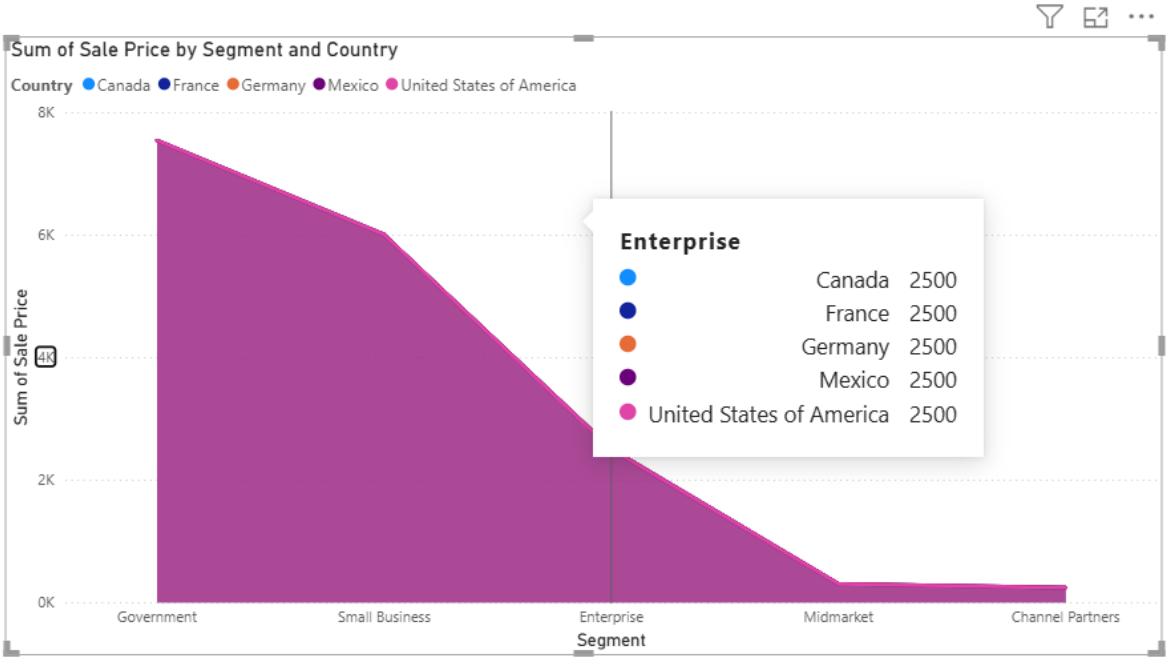
Name : Samradni Ashok Dahiphale

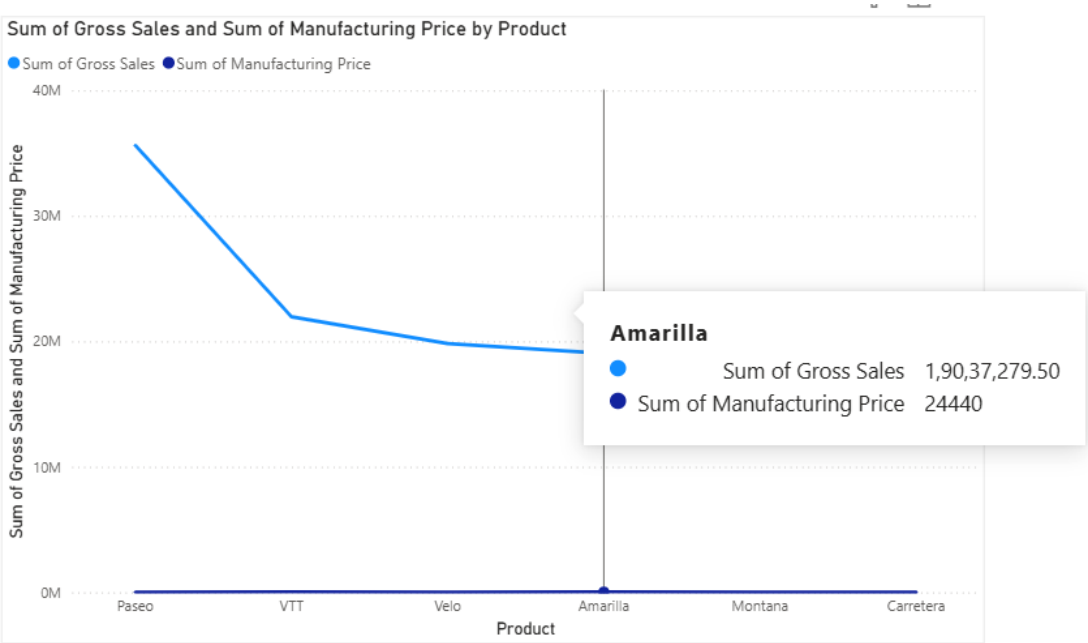
Department : IT



Storyline: Total sales across different customer segments

Analysis: Government Segment Has The Highest Sales. Small Business Is The Second Highest Contributor.Enterprise Shows Moderate And Equal Sales Across All Countries. Midmarket And Channel Partners Have Very Low Sales.Sales Are Almost Identical Across Countries, Showing Consistency.

Result: Government and Small Business drive most revenue. Midmarket and Channel Partners need improvement.



Storyline

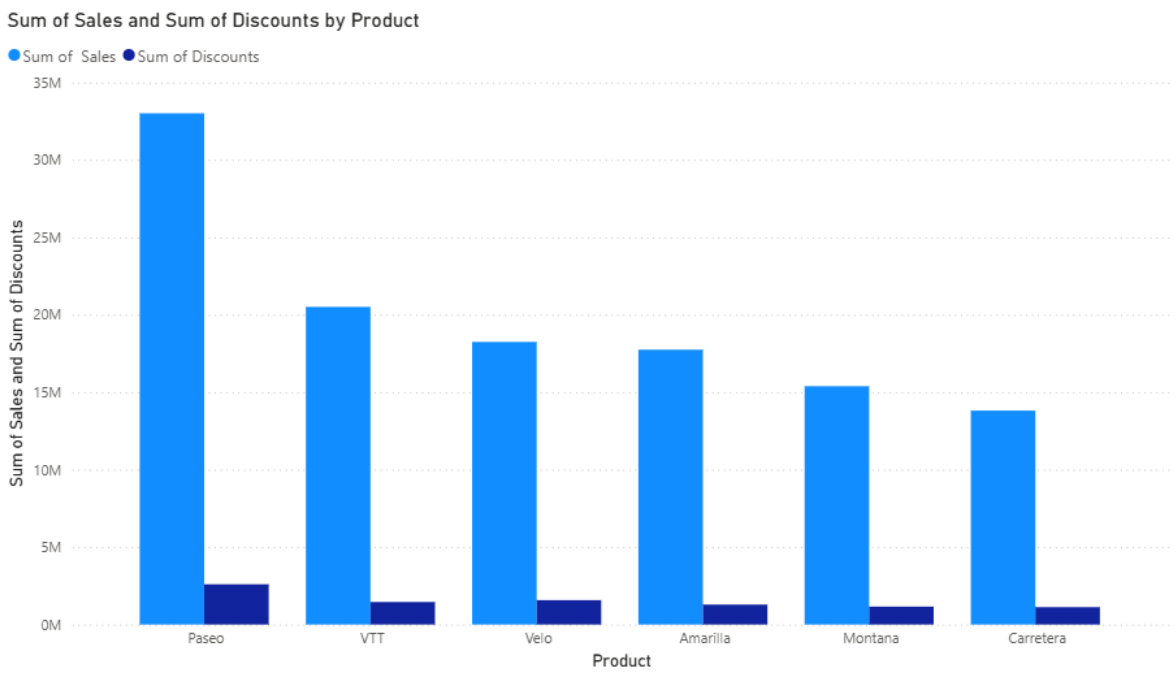
The chart compares **Gross Sales** and **Manufacturing Price** across different products to understand how sales performance relates to production cost.

Analysis

- **Paseo** has the **highest gross sales**, followed by **VTT** and **Velo**.
- **Amarilla** shows **moderate gross sales**, while **Montana** and **Carretera** have the **lowest sales**.
- Manufacturing price remains **very low and almost constant** compared to gross sales for all products.

Result

Products generate **high revenue despite low manufacturing costs**, indicating **strong profitability**.
Paseo and VTT are top-performing products, while **Montana and Carretera** need sales improvement or strategic review.



Storyline

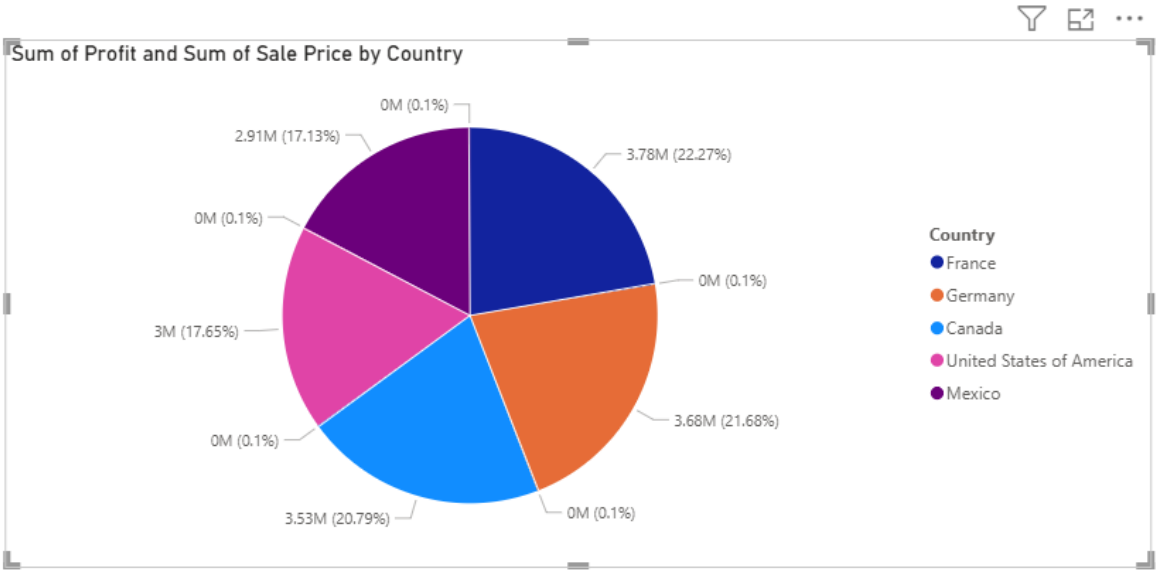
The chart compares **total sales and total discounts** for each product to understand how discounting impacts sales performance.

Analysis

- **Paseo** has the **highest sales** and also the **highest discount value**.
- **VTT, Velo, and Amarilla** show **moderate sales with moderate discounts**.
- **Montana** and **Carretera** have the **lowest sales and lowest discounts**.
- Discounts increase with sales volume, showing a **positive correlation**.

Result

Higher discounts are associated with higher sales.
Paseo is the top-performing product despite heavy discounting.
Low-performing products may need better pricing or promotional strategies.



Storyline

The pie chart represents the **distribution of total sales price and profit across different countries**, showing how each country contributes to overall business performance.

Analysis

- **France** has the **highest contribution**, accounting for around **22%** of total sales and profit.
- **Germany** and **Canada** follow closely, each contributing about **21%**.
- The **United States of America** contributes approximately **18%**, while **Mexico** contributes around **17%**.
- The contribution is fairly balanced, with no single country dominating the market.

Result

Sales and profit are **evenly distributed across countries**, indicating a **stable and diversified international market**.
France is the top contributor, while Mexico has the lowest share, suggesting potential scope for growth in that region.
